

NO LEAVES OR DEBRIS IN THE STREET!

It's everyone's job to prevent flooding and protect water quality. You can help by keeping your leaves and debris out of the street.

PREVENT FLOODING

Raking leaves into the street clogs storm drains and leads to flooding.

Reduce potential flooding by properly disposing of leaves and debris.

PROTECT WATER QUALITY

Leaves and debris left in the street can break down in the storm drain system and cause excessive algae growth in waterways like the Boise River. A health hazard for humans and animals!

PROPERLY DISPOSE OF LEAVES & DEBRIS!

**Compost • Recycle •
Trash**
