

# Working Definitions

**Bikeway:** Bikeways are distinguished as preferential roadways accommodating bicycle travel. Accommodation can take the form of Signed Shared Bikeway designation or bicycle lane striping.

**Signed Shared Bikeway (formerly Bike Routes):** Signed Shared Bikeways are on roadways that accommodate vehicles and bicycles in the same travel lane. The most suitable roadways for shared vehicle/bicycle use are those with low posted speeds (25 MPH or less) or low traffic volumes (3,000 daily vehicle trips or less).

Bergeson Street, Boise

Hill Road, Boise

School Street, Kuna

**Bicycle Lanes:** Designated exclusively for bicycle travel, bicycle lanes are separated from vehicle travel lanes with striping and also include pavement stencils.

Boise Avenue, Boise

Cherry Lane, Meridian

Curtis Road, Boise

Marigold Street, Garden City

Star Road, Star

**Multi-Use Paths:** Multi-use paths (Pathways) are used by various non-motorized users, including pedestrians, cyclists, in-line skaters, and runners, and have their own right-of-way separated from the roadway. This plan will look at connections to multi-use paths, but does not address them directly, as they are the responsibility of the county and cities' parks and recreation departments on public land, and private development/HOA within other subdivisions.
