

New Tools for Better Biking

Colored Bike Lanes

- Use in areas where autos and bicycles cross paths and it's not clear who has the right-of-way.

Pavement Markings & Signs

- Help bicyclists find a bike-friendly route.

Transit Stop Bypasses

- Route bicyclists onto the sidewalk to avoid transit.

Sharrows

- Inform motorists to expect cyclists to be in the middle of the travel lane.
- Inform cyclists that they should be in the travel lane and away from parked cars.

Wheel Gutters

- Allow cyclists to roll their bikes up and down stairways when the stairs are part of a bike route.

Bridge Shared Path Markings

- Clarify expected bicycle and pedestrian behavior.

Bike Boxes

- Give cyclists priority on bicycle streets by allowing them to go to the head of the line at a red light.

On-Street Bike Parking

- Removes an auto parking spot and fills it with bike racks.

Bike-Only Signals

- After cyclists press a signal request button, a signal brings traffic to a stop.

Cycle Tracks

- Provide dedicated space adjacent to the roadway for bicyclists.

Bike Left-Turn Lanes

- Provides a dedicated space for bicyclists to turn onto a bike route.

Bike-Only Entry

- Intersections that are closed to auto access, but allow bicycles to pass through.
