

# Fiscal Year 2010 ADA Annual Report

## Ada County Highway District Sidewalk and Curb Ramp Improvements

### Background

On December 14, 2005 the Ada County Highway District (ACHD) Commission adopted the Pedestrian Bicycle Transition Plan (PBTP). The Pedestrian-Bicycle Transition Plan (PBTP) is intended to provide a comprehensive plan to enhance the Ada County urban area pedestrian and bicycle system. This effort was initiated by ACHD, with a primary emphasis on addressing federal pedestrian planning guidelines and the regulatory requirements of the Americans with Disabilities Act (ADA).

ACHD has jurisdiction and responsibility for all public roads and streets within Ada County, Idaho, except state highways and interstate freeways. By state statute, pedestrian (typically sidewalks) and bicycle system components of most public streets also fall under ACHD's jurisdiction.

The Americans with Disabilities Act (ADA), enacted on July 26, 1990, provides comprehensive civil rights protections to persons with disabilities in the areas of employment, state and local government services, and access to public accommodations, transportation, telecommunications and pedestrian facilities.

There are five titles or parts to the ADA; Title II is of most concern to ACHD. ACHD's PBTP is intended to address the most recent ADA policies and rules. Title II of the ADA prohibits state and local governments from discriminating against persons with disabilities by requiring them to make all programs, services, and activities accessible to persons with disabilities. Title II requires that a public entity must evaluate its services, programs, policies, and practices to determine whether they are in compliance with the nondiscrimination requirements of the ADA.

The ADA requires that a Transition Plan be prepared, to describe any structural or physical changes required to make programs accessible. The Transition Plan outlines the methods by which physical or structural changes will be made to effect the nondiscrimination policies described in Title II. Commensurate with the ADA requirements for inventory and self-evaluation, ACHD targeted a significant portion of the overall planning effort to complete a walking inventory of the entire, street-side pedestrian system within the Ada County urban areas.

More than 2,800 miles of existing and missing sidewalks and 19,300 street corners (with 15,500 curb ramps) were inventoried and assessed as part of ACHD's Self-Evaluation. Documenting the location, type and condition of sidewalks and curb ramps is an important step in the pedestrian planning effort. A full inventory of missing sidewalks helps identify the critical "gaps" to fill. ACHD successfully completed a

thorough inventory of the pedestrian system as the basis of the PBTP planning effort. Prior to the PBTP effort, no such inventory existed.

In addition to establishing the baseline data set, ACHD established standard operating procedures to ensure that the GIS database for sidewalk and curb ramps remains current as new facilities are installed and substandard facilities are repaired.

## Purpose

Since the adoption of the PBTP, ACHD has worked diligently to plan for and construct improvements to the pedestrian system that bring the sidewalks and curb ramps in Ada County into compliance with ADA. The purpose of this annual report is to describe the improvements to the pedestrian system that occurred in fiscal year 2010. Each fiscal year new improvements are cataloged and added to the overall pedestrian facility database that was created in 2005.

## New Facilities

ACHD is constantly expanding the length of sidewalks and number of curb ramps in the county and its six cities. The new sidewalks and curb ramps are primarily constructed through one of the following programs or activities:

- Large scale ACHD “Capital Projects” such as roadway expansion, and overlays;
- Smaller scale ACHD “Community Programs Projects” such as sidewalk construction, safe routes to school projects, and curb ramps;
- Residential and commercial subdivisions;
- Miscellaneous commercial and residential building permits (not captured in the FY 2009 inventory due to data constraints),

ACHD expends significant amounts of federal and local funds to construct new improvements to the pedestrian system. In addition to sidewalks and curb ramps that are constructed with ACHD Capital Projects (i.e. roadway widening and overlays), the ACHD Commission has dedicated five percent of ACHD's capital budget to pedestrian specific projects (not associated with a specific roadway project). In 2009 the voters of Ada County approved an increase in vehicle registration fees to fund pedestrian projects near schools. These efforts by ACHD go above and beyond the Federal Highway Administration (FHWA)'s Safe Routes to School Program, which makes federal funding available through grants. ACHD applies for federal grants, but has historically been a leader in locally funded safe routes to school improvements.

Private development through subdivisions and new construction funds and constructs large portions of the new pedestrian network. ACHD works closely with developers to ensure that the pedestrian facilities constructed with private funds are ADA compliant. ACHD inspector's visually inspect and sign off on all improvements in the public right-of-way prior to official acceptance of the improvements.

## Repaired Facilities

ACHD also has a Sidewalk Repair Program that focuses on repairing or reconstructing substandard sidewalks and curb ramps. Historically the sidewalk repair program has focused on repairing sidewalk and curb ramps based on citizen concerns/requests. In coming years ACHD anticipates a more programmatic approach to repairing and replacing substandard pedestrian facilities.

## Fiscal Year 2010 Achievements

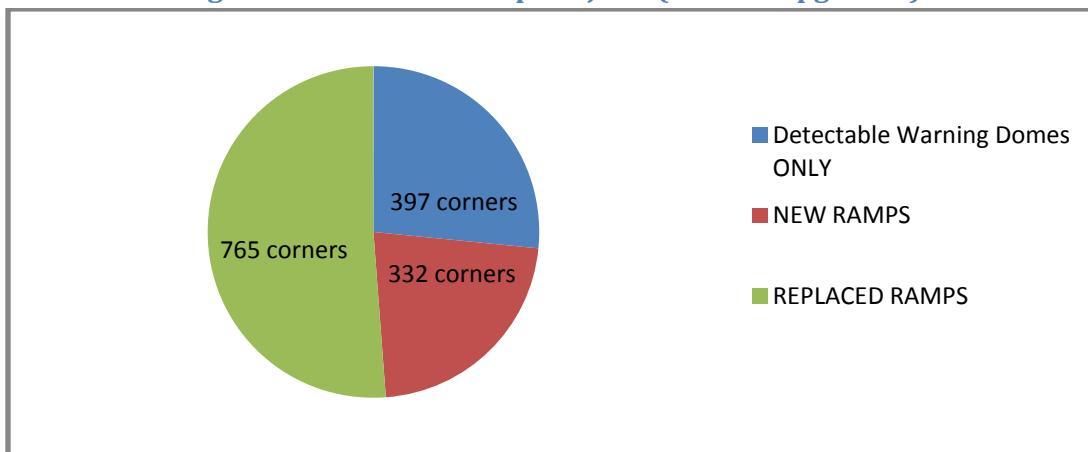

In fiscal year 2010 ACHD and private development installed nearly 22 miles of new sidewalks in Ada County. In addition to the new sidewalks, ACHD repaired 4.7 miles of substandard sidewalks. Figure 1 below illustrates the total mileage of new and repaired sidewalk for fiscal year 2010. The total estimated investment in new and repaired sidewalks projects for fiscal year 2010 is close to 2.4 million dollars (further project details and cost estimates are described in Appendix A and map of project locations is shown in Appendix B).

**Figure 1. 2010 Sidewalk Projects (in miles)**

During same time period ACHD and private development installed 1097 new pedestrian ramps across Ada County. ACHD through its maintenance activities and sidewalk repair program replaced or upgraded an additional 397 pedestrian ramps to bring them into compliance with current ADA standards. The total estimated investment in new and repaired/replaced curb ramps for fiscal year 2010 is 2.1 million dollars.
